73! Wolf DL7RT + Holger DL7SP

---

2 OP's and one XYL went to the Principality of Liechtenstein to operate the CQWW-DX-Contest 1979 (phone) in the multi/single class. OP's were Holger DL7SP and Wolf DL7RT, supported by Heidi, DL7RT's XYL. We used Dråke TR4C with RV4C, a homemade LA with abt 900 Watts output, a 2-El Yagi by Fritzel and dipoles for 160,8o,40. We had a nice log-cabin in Masecha (FL) with nothing but 220 Volts. If you have worked us on the lower bands you will have worked Wolf DL7RT (5B-DXCC), if you have worked us on higher bands you will have worked with Holger DL7SP (DXCC). During a period of 55 h we made abt 3.2oo QSO's and hope you could get a new country. QSL is OK via DARC or direct via DL7RT. This QSL is valid without signature, because all QSO are tobe confirmed by a computer-label from our log. Best 73 from **DL-DXPEDITION-GANG**, see you next from?? gd DX!
